## TOWNSFOLK

**Talismonger**
On your 1st night, choose a player (not a Traveller): you learn 1 good & 1 evil character, 1 of which is correct. When they die, you become the other.

**Rigger**
On your 1st night, choose a player (not a Traveller): you learn how many character types there are amongst them & their neighbours (except Travellers).

**Face**
Each night*, you learn if you & the Demon both voted on today's 1st nomination.

**Decker**
Each night*, choose a player: you learn a reminder token next to their character token (if any).

**Shifter**
Each night*, choose an alive player. If good, they die & the Demon doesn't kill tonight. One good player registers as evil.

**Bodyguard**
Each night*, choose a player (not yourself): they are safe from the Demon tonight.

**Sensitive**
Each night, choose a player who is not next to you: you learn if at least 1 of their alive neighbours is evil. There is a good player that registers as evil to you.

**Analyst**
Each night, you learn how many players' abilities worked abnormally (since dawn) due to another character's ability.

**Snoop**
Each night, you learn a character that is not in play.

**Detox**
Each night, choose a player: they are protected from being drunk or poisoned until dusk.

**Seer**
Each night, choose 2 players: you learn if either is a Demon. There is a good player that registers as a Demon to you.

**Fixer**
Each day, you may publicly invite 1 alive player seated next to you or a crew member to join your crew. Tonight, if an evil player joined, the entire crew dies.

**Dzoo-noo-qua**
You have the ability of the recently killed executee. If they are evil, you are poisoned until a good player dies by execution.

**Adept**
Once per game, at night, choose a good character: gain that ability. If this character is in play, they are drunk.

**Street Samurai**
Once per game, during the day, publicly choose a player: if they are evil, they die.

**Latent**
You think you are an Outsider, but you are not. The 1st time an evil player chooses you with their ability, it fails & you gain a not-in-play Townsfolk ability. **[+0 or +1 Outsider]**

## OUTSIDERS

**Ghoul**
You think you are a Townsfolk & gain their ability. Players seated next to you are poisoned. If you are "mad" about being the Ghoul, you might die tonight.

**SINless**
Evil knows you are the SINless, the Storyteller may lie to you & you can register as any character.

**Loose End**
When you die, the Demon chooses a player: they learn that player's character.

**Otaku**
Drunk or poisoned Townsfolk abilities yield false info. When you die, 1 player is drunk from now on.

**Invae**
When you are executed, that night the Demon chooses an alive good player: they become an evil Minion, or refuse & die, even if for some reason they could not. They learn which Minion only if they accept.

## MINIONS

**Mr. Johnson**
On your 1st night, choose a player. If you die, they turn evil that night & learn you are Mr. Johnson. If 5 or fewer players are alive, you lose this ability. **[-1 or +1 Outsider]**

**Spoof Command**
Each night, choose 2 players: tonight, everyone who chooses the 1st with their ability chooses the 2nd instead.

**SURGE**
You do not know your ability. Each night, choose whether to activate it.

**Convergence**
Each night*, guess the character of every other player. The 1st time every guess is correct, play for 1 more day: if the Demon is not executed that day, your team wins.

**Nuyen**
Each night, you get 1 nuyen & may earn more by completing the Storyteller's objectives. Each night, you may spend nuyen: 2 to poison a player, 3 to learn a player's character, or 4 to choose a player who dies.

## DEMONS

**Shedim**
Each night, Minions choose an alive player as the Shedim's host: they are evil, "the Demon" & have no ability. Good players die when the Shedim leaves them. **[+1 Minion]**

**Black Widow**
Each night*, choose a player: they die. 1 player knows you. If you die while 5 or more players are alive, they are evil & the Black Widow from now on. **[-1 Outsider]**

**Killswitch**
Each night*, choose a player: they die. On your 1st night, choose a player: they have a cortex bomb. When the bombed player dies, 1 of their alive neighbours dies too.

**Ghilani**
Each night*, if no-one died today, choose a player: they die. On your 1st night, choose a player: they are infected. Infected players are poisoned & infect their good alive neighbours if executed. **[+1 Outsider]**

## FABLED & LORIC

**Djinn**
Use the Djinn's special rule. All players know what it is.

If the Latent is chosen as the host before awakening, they awaken and do not die when the Shedim leaves them.

If the Talismonger is chosen as the player who knows the Black Widow, they are never shown Convergence as their evil character.

The Street Samurai cannot kill the player with the Faux Paw.

**Sentinel**
There might be 1 extra or 1 fewer Outsider in play.

**Spirit of Ivory**
There can't be more than 1 extra evil player.

**Bootlegger**
The Shedim's host never counts as an extra evil player for the Spirit of Ivory. When an ability has the Demon choose someone or learn something, a Minion does it instead of the host.
